Techspan Threaded Adapters easily convert – or mate – one thread style with another. These adapters are offered with both internal and external threads that mate NPT with Metric (or ISO) style fittings. They are constructed of machined aluminum with electroless-nickel plating for enhanced protection against corrosion, friction and contamination. The threaded adapters also incorporate a Viton™ O-Ring to provide a liquid-tight seal. This product family is UL Recognized and meets ASTM, MIL and AMS specifications.
