

CTP-L1-AR-U-HA-AE-SAB-122813 (Order no. 122813)

Safety switch with guard locking CTP-AR, RFID, plug connector M12, escape release

- ▶ Closed-circuit current principle
- ▶ Unicode
- ▶ Monitoring output door position OD
- ▶ Monitoring output diagnosis OI
- ▶ Guard lock monitoring output OL
- ▶ 2 x plug connector(s) M12, 5-pin and 8-pin
- ▶ Escape release

Approach direction

Horizontal

Can be adjusted in 90° steps

Guard locking principle

Power to unlock: On a guard with guard locking based on the closed-circuit current principle, the guard is locked by spring force until the guard locking solenoid is supplied with power. Unlocking is by solenoid force. The term mechanical guard locking is also used.

Unicode evaluation

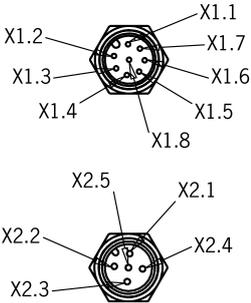

Each actuator is highly coded (unicode). The switch detects only taught-in actuators. Additional actuators can be taught-in.

Only the last actuator taught-in is detected.

Escape release

This is used for manual release of guard locking from the danger zone without tools.

Accessories required

Actuator is not included.

The safety switch can only be actuated in conjunction with the actuators provided for this purpose.
