

NGLE060RT (Order no. 029220)

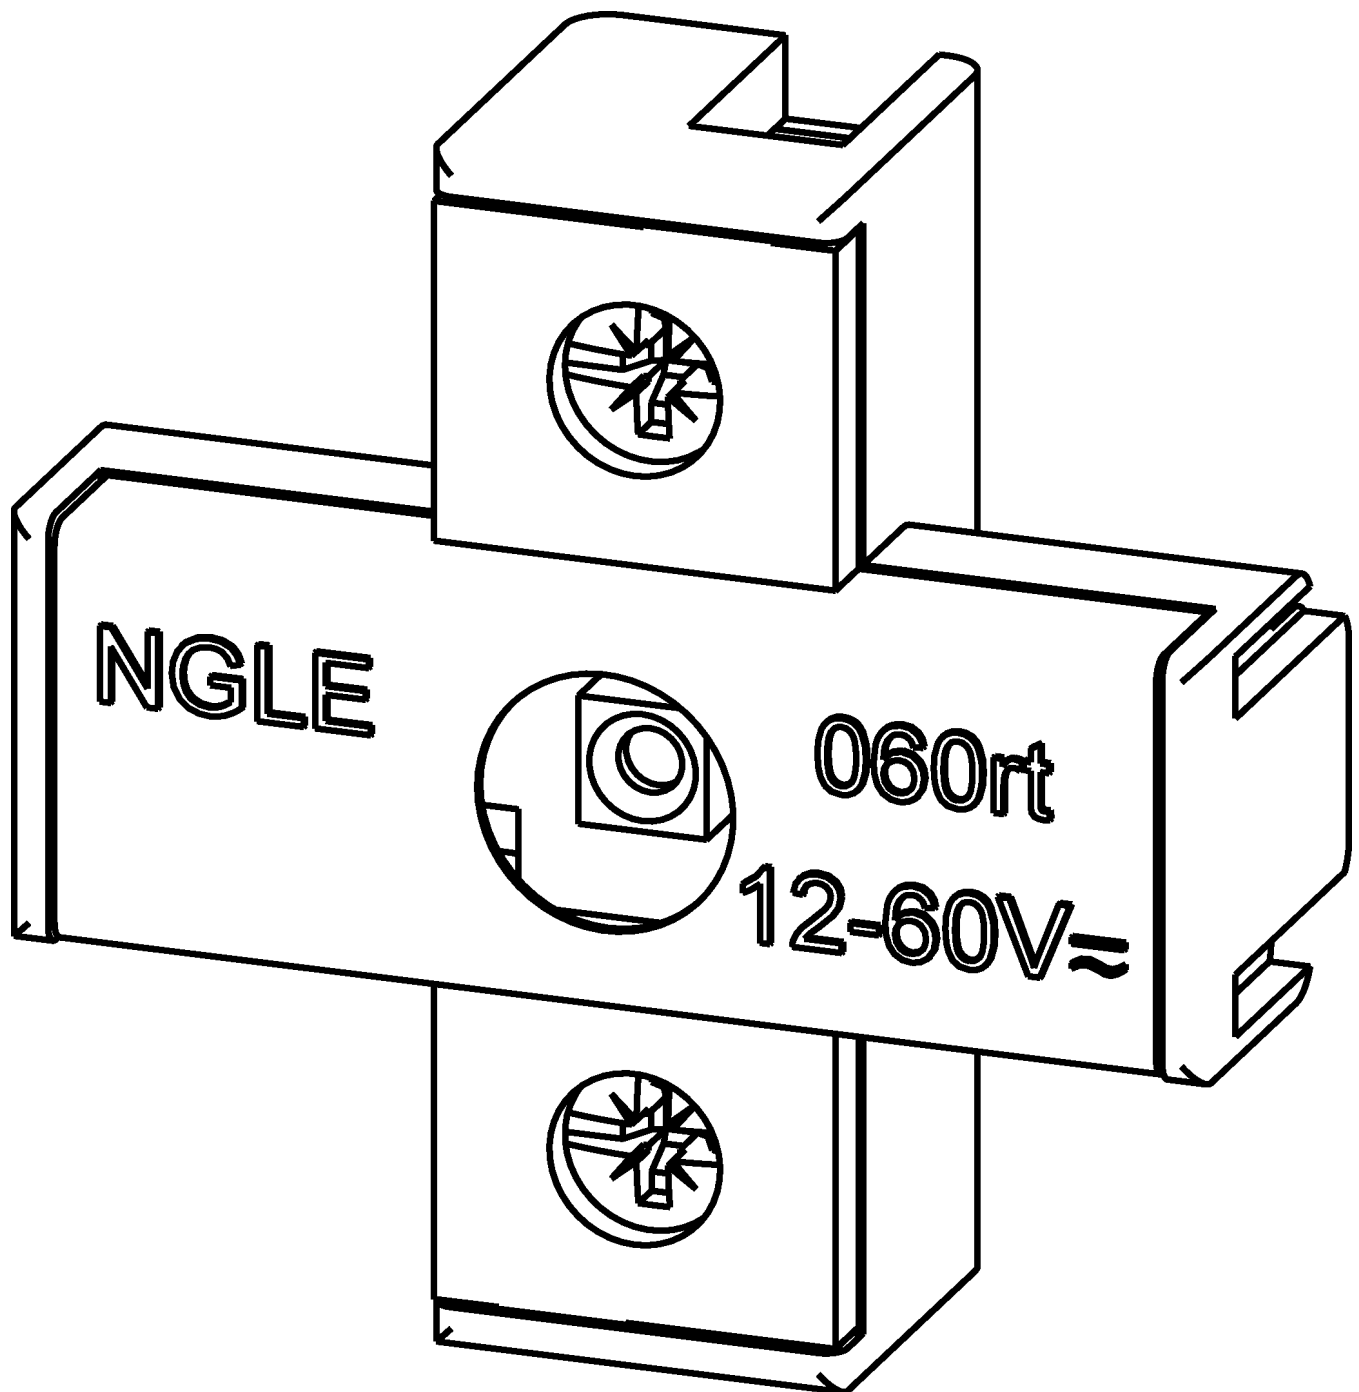

LED function display NZ

Upgrade kits with LEDs are available for the safety switches NZ. The intensity of the light from the indicators is always the same, independent of the voltage applied.

Note: The LED function display can only be used in conjunction with double switching elements.

Dimensional drawings

Technical data

Operating and display elements

LED display 1 LED, red

Electrical connection values

Operating voltage

LED 12 ... 60 V
(LED with rectifier)

Mechanical values and environment

Storage temperature -25 ... 70 °C
