Unicode evaluation

Each handle module is highly coded (unicode). The locking module detects only handle modules that have been taught-in. Additional handle modules can be taught-in. Only the last handle module taught-in is detected.

Guard locking type

MGBS- L2 Guard locking actuated by power-ON and released by spring force (open-circuit current principle).

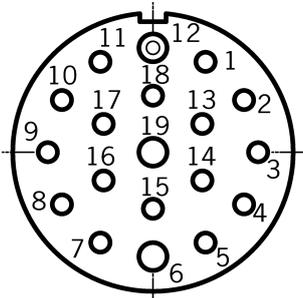

Lens set

The color of the pushbuttons can be selected using the color cover set included (5 colors).

Escape release

It is used for manual release of the guard locking without tools in an emergency. The inner door handle permits escape from the danger zone.
