

AE-R-S1-158322 (Order no. 158322)

Inner door handle AE-R-S1

- ▶ Inner door handle silver colored
- ▶ A sticker describing the opening sequence is included with the locking module
- ▶ Extended actuation axis for thicker doors (order separately)

Inner door handle

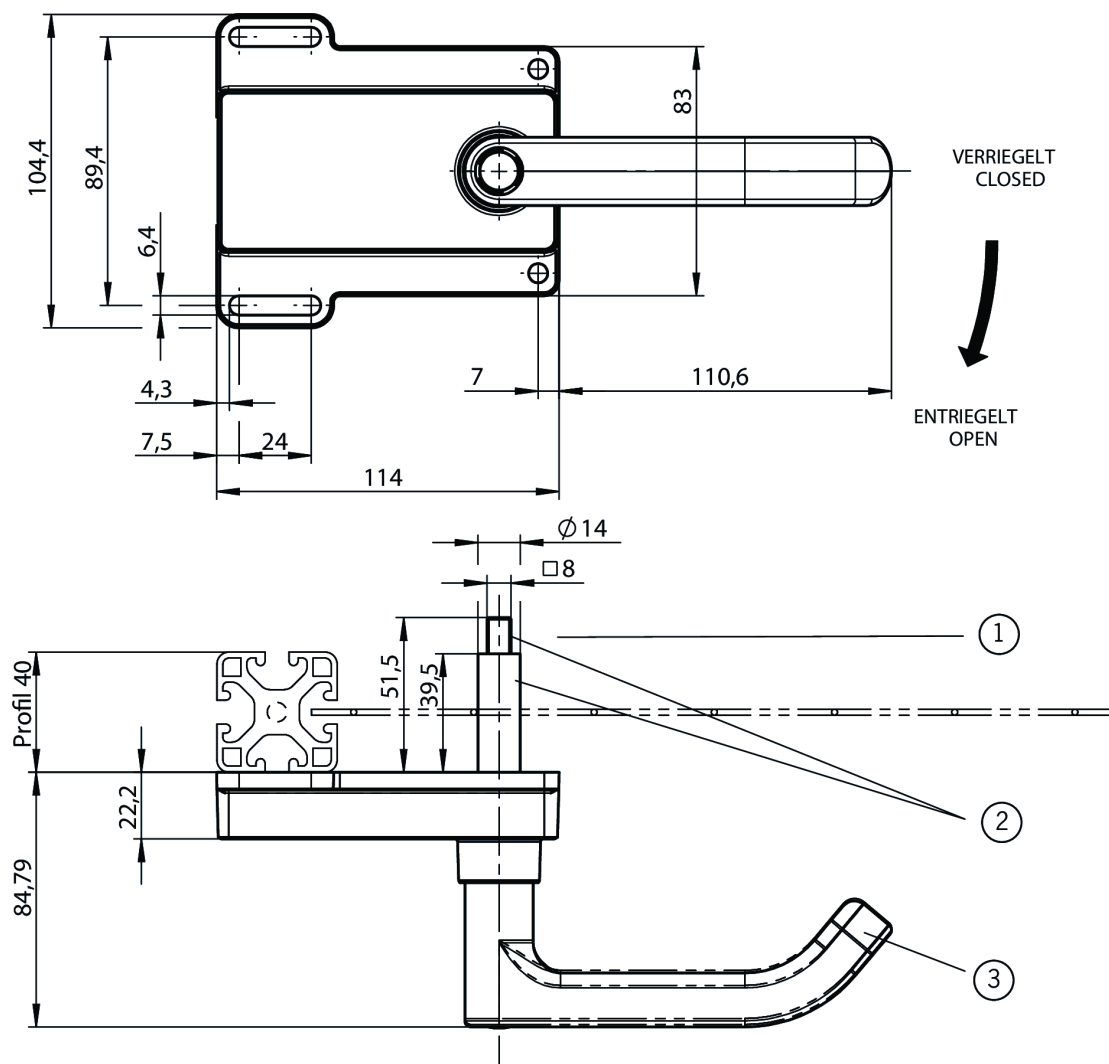

In combination with a locking module with escape release, the safety system must be equipped with an inner door handle. It enables people shut in to open the locked door from the danger zone.

The actuation axis supplied is suitable for profiles up to 40 mm.

Extended actuation axis

Optionally, for thicker doors or profiles >40 mm, a 250 mm long actuation axis (order no. 106761) (instead of 110 mm) can be ordered. The axis can be shortened to the required dimension.
