538H Slow-action switching contact 2 positively driven contacts →

Accessories required

Actuator is not included.

Functional drawings

Dimensional drawings

- 1) Order actuator separately. The safety switch and actuator must be placed together for attachment to the machine. Do not use actuator as an end stop. Limit overtravel separately.
- 2 Actuating direction can be changed
- 3 Standard
- a Travel without operation: actuator is in the guide slot, but function is not triggered.
- b Switching operation completed: actuator must be inserted to this point to ensure safe switching. The actuator must be withdrawn at least to point a for switching off.
