

EINFUEHRTRICHTER-P (Order no. 086237)

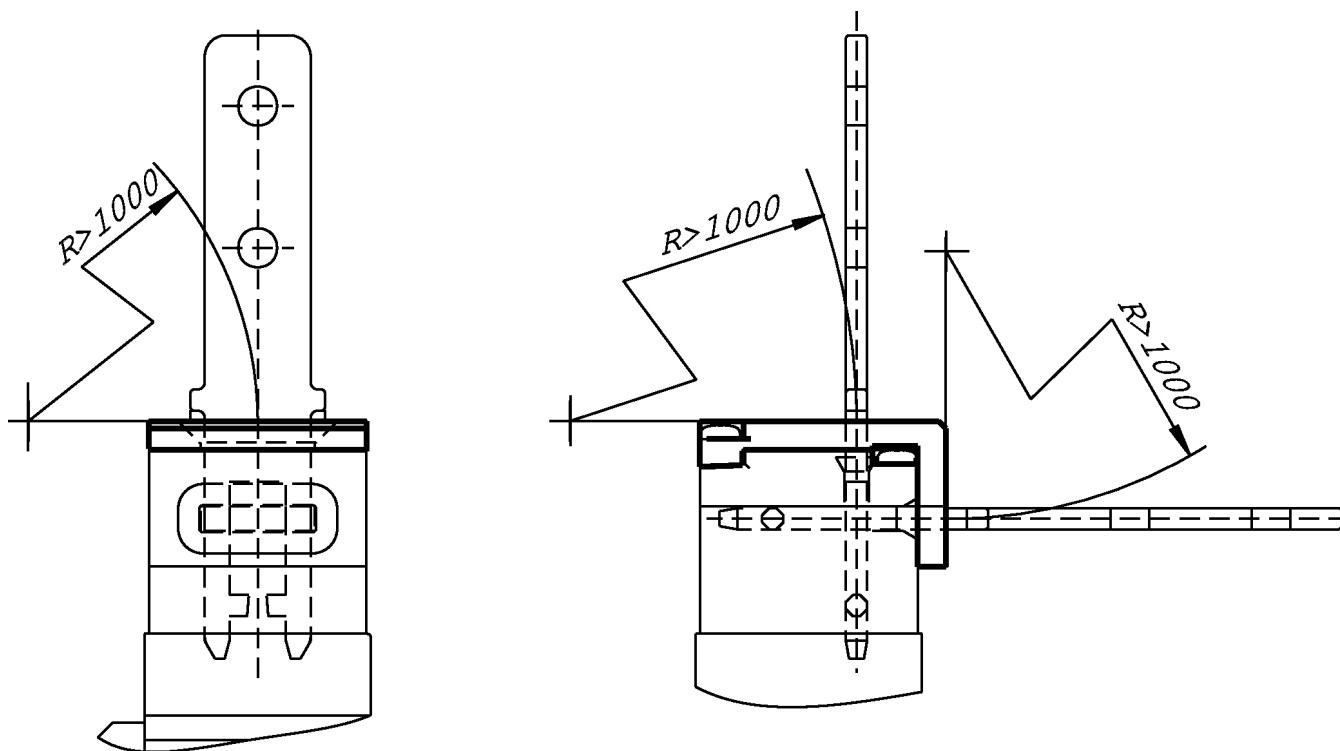

Insertion funnel for safety switch NP..A/GP/TP..A

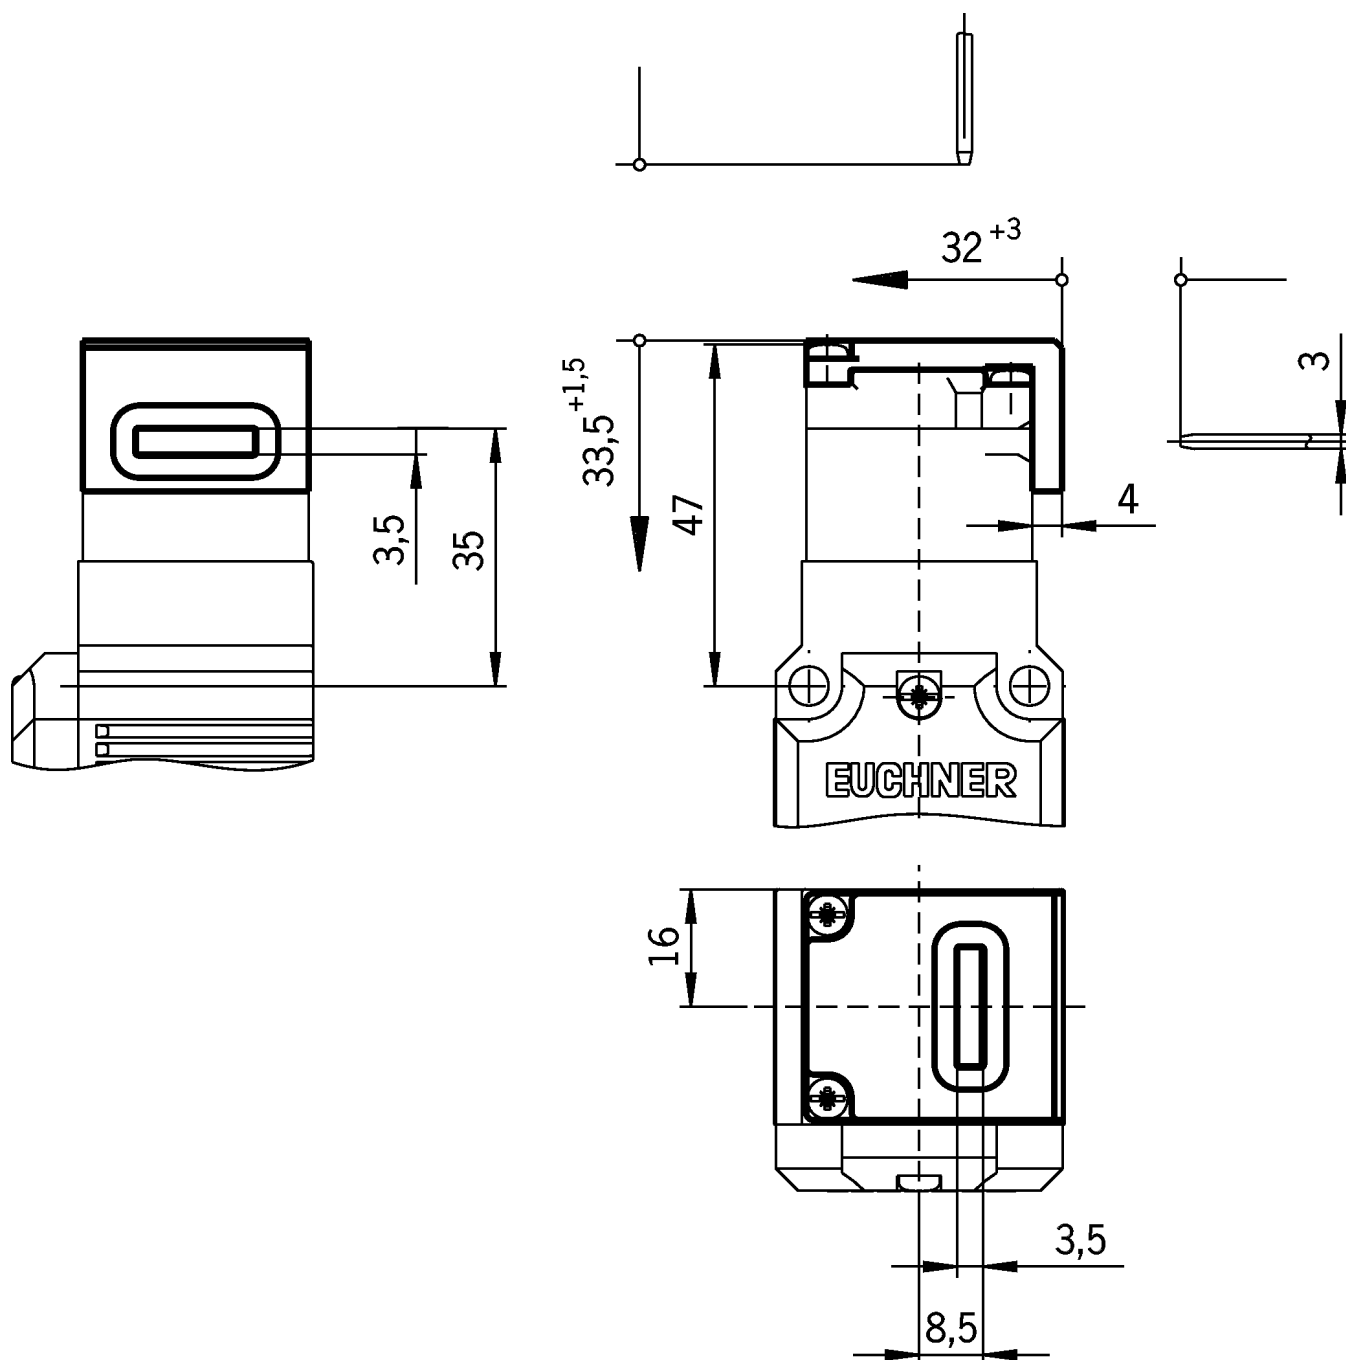

If an insertion funnel is used, even inexactly positioned actuators are inserted reliably in the actuating head due to the large opening funnel, thus protecting the safety switch against mechanical influences.

- ▶ Cannot be used in conjunction with TP safety switches with increased overtravel from the top
- ▶ The insertion funnel for TP can only be used in conjunction with an actuator with long overtravel
