

AE-K-A1-IUK2-109212 (Order no. 109212)

Lock for auxiliary release for safety switch CTP/CTA/TP/STP

- ▶ Identical locking
- ▶ Key can be removed only in “unlocked” position

The lock is used in combination with safety switch CTP/TP/STP. The auxiliary key release enables authorized personnel to actuate the auxiliary release using the related key. The unlocking mechanism holds the solenoid in the “unlocked” position. 2 screws are used to fix the lock to the cover of the safety switch (above the auxiliary release).

- ▶ Order safety switch CTP/TP/STP separately
- ▶ 2 keys are included
- ▶ Every safety switch of the series CTP/TP/ STP can be upgraded to include a lock.
