

## SCHLOSS STA GLEICHSCHLIESSEND (Order no. 105350)

### Lock for auxiliary release for safety switch STA

- ▶ Identical locking
- ▶ Key removable in both positions

The lock is used in combination with safety switch STA. The auxiliary key release enables authorized personnel to actuate the auxiliary release using the related key. The unlocking mechanism holds the solenoid in the “unlocked” position. 2 screws are used to fix the lock to the cover of the safety switch (above the auxiliary release).

- ▶ Order safety switch STA separately
- ▶ 2 keys are included
- ▶ Every safety switch of series STA can be upgraded to include a lock
