

TZ2LE110SR6 (Order no. 052914)

Safety switch TZ, plug connector M26 (SR6)

- ▶ Plug connector M26 (SR6)
- ▶ Auxiliary release
- ▶ LED indicator
- ▶ Actuating head fitted left
- ▶ Open-circuit current principle

Approach direction

Horizontal

Can be adjusted in 90° steps

Guard locking principle

Open-circuit current (power on to lock): On a guard with guard locking based on the open-circuit current principle, the guard is locked until the power supply to the guard locking solenoid is interrupted.

Unlocking is by spring force. The term electrical guard locking is also used.

LED indicator

The LED indicator illuminates red when the safety door is open or closed. It switches off when the safety door is locked. The LED indicator illuminates green when the safety door is closed or closed and locked.

Switching element

SK 528 Slow-action switching contact

Contacts for door monitoring: 1 positively driven contact  + 1 NO contact

ÜK 528 Slow-action switching contact

Contacts for guard locking: 1 positively driven contact  + 1 NO contact

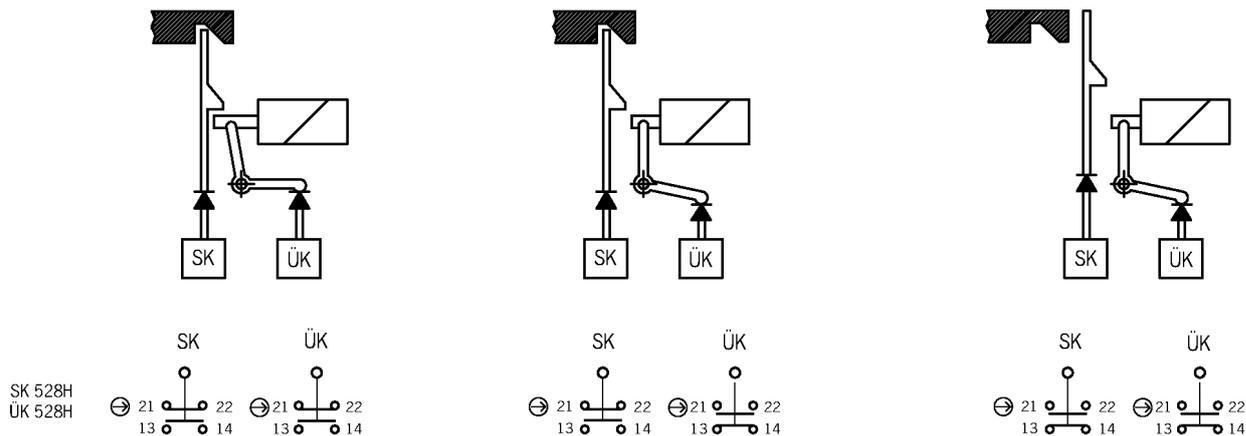

Auxiliary release

The auxiliary release on the front makes it possible to access the machine if there is a malfunction, e.g. a power failure. Unlocking is performed using a tool or a key. The auxiliary release must be protected against misuse (sealing, lacquer).

Accessories required

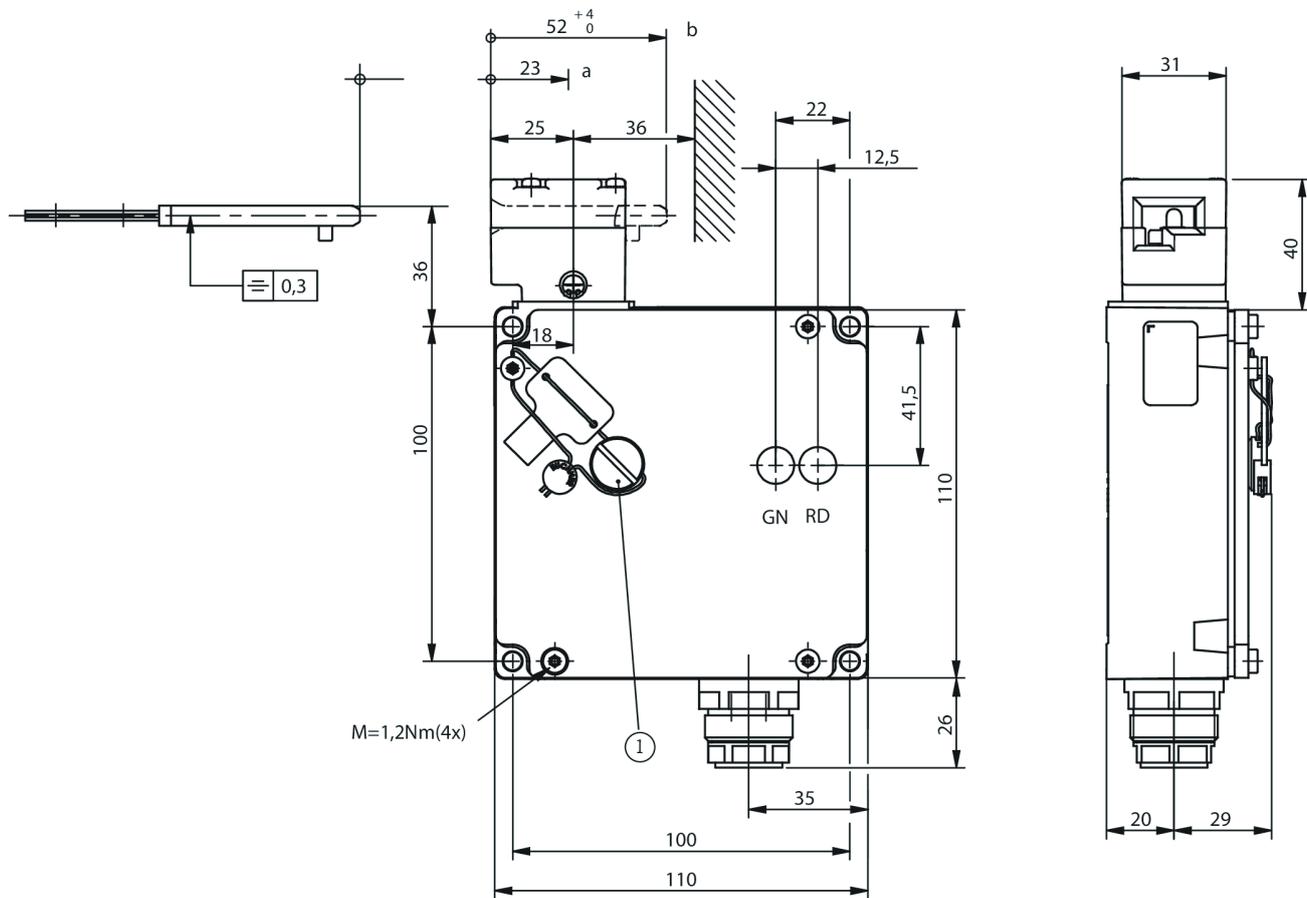

Actuator is not included.
