

product type designation

product description

Bracket for readers and antennas

Solid stainless steel bracket with +/- 45° vertical/horizontal angle adjustment and screw lock

SIMATIC RF600 antenna holder 3-way kit stainless steel; for RF600 readers and antennas except RF62xA and RF615A packing unit 1 unit.

suitability for use

For 3-way mounting and adjustment of RF600 readers and antennas

suitability for operation

mounting for RF600 readers and antennas with VESA 100 mounting system with screw locking against misalignment

mechanical data

material

Stainless steel

color

metallic

ambient conditions

ambient temperature

- during operation -25 ... +85 °C
- during storage -40 ... +100 °C
- during transport -40 ... +100 °C

design, dimensions and weights

width

115 mm

height

95 mm

depth

120 mm

net weight

750 g

standards, specifications, approvals

reference code

- according to IEC 81346-2:2019 UPB

Security information

security information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit

www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
